

Power Construction expands into Africa

From small beginnings in the Western Cape to expansions throughout South Africa, Power Construction has taken yet another bold leap with the launch of its focus in Africa. "In line with our purpose 'Improving the quality of life in Africa', we have made good progress in supporting our strategy of operating in other African countries," explains Chano Hughes. The company has undertaken investigation in Uganda, Kenya, Nigeria, Angola, Zimbabwe and Mozambique, thus far.

In 2008, the first enterprise was registered in Africa, Power Construction East Africa. An equal partnership with Rockworld, a local company in Kenya, renowned for its value based approach to business.

Power Roads Zimbabwe was registered in 2009 as a 50/50 partnership with Augur Investments, in Harare. In September 2009, work began on the first joint project. With a value of USD\$72 million, this involves the development and construction of a 10.8km dual carriageway, 4km of slip roads, six bridges and two major culverts for the city of Harare. The road connects the International Airport to the Harare CBD.

Both business relationships have been built on Power values. We are confident that the business undertakings in Africa will yield positive long-term results, and assist in the upliftment of local businesses and communities.

AND MORE...

UNASHAMEDLY ETHICAL

Power raises the bar with new BBBEE status

Power Construction achieved a Broad Based Black Economic Empowerment Level 3 Contributor status for 2010. "Our new status gives us an edge to compete with all our competitors," explains Glenville Cullum. After extensive work, Power Construction was awarded with its Level 3 status in December 2009.

Power Construction received its first BEE accreditation certificate in December 2008 when it achieved a Level 5 Contributor status. The company has had a long history of empowerment, long before it was enforced by government. Sibakhulu, Hughmic, Nikamandla Construction and Khayaletu Projects are examples of the Power Group's initiatives.

"We are proud to be part of Government's transformation programme." The company will continue its commitment to the process.

Power Construction was named the corporate winner of 2009's National Productivity Awards in South Africa. This prestigious accolade was awarded to the company, by Productivity SA, at a gala ceremony on October 30, 2009 at The Theatre on the Track in Kyalami, Johannesburg.

Treating HIV/AIDS responsibly.

Power dedicated the 21st anniversary of World AIDS Day on December 1, 2009 to its own HIV/Aids Employee Wellness Programme. Operating for nine years, the programme has encouraged staff to learn of their status, helped to prevent new infections and provided treatment for HIV positive staff. According to Marlene Cronje, the treatment programme's success - for respecting HIV positive staff and providing adequate healthcare for their wellbeing - is reflected in the steady increase in the number of employees who have voluntarily signed up. In 2009, 74 employees were on the programme, up by 12 from 2008.

"The company currently has an 8% infection rate". The programme takes special emphasis on prevention and treatment. "We do frequent testing and training, and have an active peer facilitator programme in place. We also provide treatment for employees not on a medical aid scheme," says Marlene. The company encourages its employees to take a responsible approach towards HIV/Aids by undergoing an HIV test and talking to friends, family and work colleagues about HIV prevention. So far, these interventions have helped to reduce staff absenteeism, and have had a positive impact on improving the level of trust between employees and management.

Mayor's Medal awarded to Graham Power

At a special ceremony held in Cape Town on 28 April 2010, Graham Power, together with approximately 30 other individuals, received awards at the Civic Honours Ceremony in the Council Chambers.

Graham was awarded the prestigious Mayor's Medal for Social Affairs and Services. These awards are made annually and acknowledges outstanding contributions that are voluntarily made by individuals or associations to the Cape Metropole and her people. The awards are categorized in 8 fields: Community Affairs, Social Affairs and Services, Cultural Affairs, Youth, Recreation and Sport, Conservation, Economic Affairs and Extraordinary Bravery.

We give thanks to God that Graham's dedication to the people of the City of Cape Town has been celebrated with this special award.

Graham, you make us proud!

Power Construction North Division

Report by Francois Voigt

The strategic decision to establish Power Construction in Gauteng has been one of the best we have made to date. Initially we did small projects for Power Developments in the area and have now over the last 5 years managed to build the capacity in Gauteng to execute major projects such as the Serengeti Golf and Wildlife Estate and the R21 Gauteng Freeway Improvement Project to the value of R 610 Million. Our Gauteng base has also enabled us to be involved in the GFIP JV's to the value of R2.1 billion. We have built up our resources and can now provide services in all spheres of construction including roads, earthworks, municipal services, concrete works, asphaltting and building. Our success thus far is largely due to our dedicated and competent staff who helped create a solid and capable structure to support our rapid growth in Gauteng.

Our goal and objective for Power North is to continue to build on the experience we have gained so that we could expand our services into the mining market. We also intend to increase our capacity to do larger concrete works. We furthermore will use Gauteng as a base to explore opportunities in the surrounding Provinces and Africa.

MD for Construction

Over the past 5-6 years, Power Construction was engaged in a process of Senior Management succession planning, which incorporated revised business structures being implemented, together with appointed leadership teams in all divisions.

As of 11 January 2010, Poens Venter is carrying the responsibility of MD for Power Construction! Poens has been part of the leadership of Power since May 2000, and over time, has shown his ability to take up this responsibility.

He has been instrumental in many strategic decisions that were needed over this period. Poens will head up a broader leadership team, in order to face the challenges of the future, which we have no doubt, they will be able to do. We congratulate Poens on this appointment, and wish him and the team the best of success! As CEO, André du Preez will continue to support the team.

Changing the face of Gauteng...

The North division is rapidly working towards completing the R610 million 'R21 Olifantsfontein' contract, one of Gauteng's busiest connecting roads.

Part of SANRAL's Gauteng Freeway Improvement Project (GFIP); Power is upgrading 12km of the R21 (GFIP Package H), in the east of Johannesburg from the Benoni interchange to the Olifantsfontein interchange, the main link between the OR Tambo International Airport and Pretoria. This involves the upgrading of both carriageways, from two to four lanes, the widening of existing on and off-ramps at the Benoni interchange; the widening of the bridges of the Bapsfontein (R25) and Olifantsfontein interchanges to accommodate additional lanes, and the widening of two railway bridges, amongst others.

"Through innovative planning, the Power team has kept the project on schedule, despite weather delays, heavy traffic and other disruptions, including the national labour strike in July 2009. The project is due for final completion by August 2010," says Dieter Vietze.

Johannesburg's N1 freeway speeds ahead

The Siyavaya Highway Construction Joint Venture was established between five companies, including Group Five and Power Construction, for work on the Gauteng Freeway Improvement Program (GFIP). The Joint Venture was awarded two work packages: Package A1 & A2 and Package E1 & E2 in June 2008. Work Package A1 & A2 comprises of work around the section of the N1 Freeway, South West of Johannesburg before the Golden Highway Intersection, and ends just after the 14th Avenue Intersection.

Louwtjie Louw explains that this contract involves the widening and upgrading of the N1 Freeway, as well as the widening of the four bridge structures and upgrading of five intersections that the N1 passes through. This tender is valued at R1.2 billion and has a construction period of 24 months.

"From the start Work Package A1 & A2 was a challenge for Siyavaya due to the time constraints for the completion of the contract and the penalties applicable if the deadline for the FIFA Soccer World Cup event is not met," says Louwtjie. The contract must be completed by May 28, 2010 - or a penalty of R5 million, plus R120 000 per each calendar day late will be applicable if this is missed.

The Siyavaya team on Package A is proud of their progress on the contractual work programme. "The team - with all things equal: weather, material, suppliers and labour - is confident to complete the contract in time," says Louwtjie.

Siyavaya Work Package E powers ahead

This R2.1 billion project includes work on two roads: a 12km section of the N3 to the southeast of Gauteng; and a 4km section of the N12 between the Reading (R59) and Elands (N3) interchanges. The 36-month project commenced in July 2008; however, due to various disruptions, the completion date was revised to November 2011.

The project entails the construction of three incrementally launched bridges, including a 400m-long bridge at the Elands interchange. The substructures for these have been completed and the incremental launches are underway. Other features of this project include the moving of a 2.2m diameter Rand Water pipeline to accommodate a new ramp at the Elands interchange, and the construction of two new loops at Grey Avenue. New lanes are constructed using a crushed stone base with a BRASO overlay. The improvements at the Reading interchange also proved to be complex requiring innovative engineering solutions for the construction of two portal bridges.

Martin Hart is the project manager on site. The team proudly reports that they are excelling in this complex and challenging project.

Route 21 completed

In December 2009, Poens Venter, confirmed the completion of the R123 million work for the rehabilitation and upgrading of Route R21.

The Gauteng team, under Gerrit Cornelissen's guidance, started this contract in May 2008 and was faced with many challenges, reports Poens. Route R21, also known as the Albertina Sisulu Freeway, from the Hans Strijdom interchange in Pretoria to Boksburg. The contract involved work on the 3.5 km stretch between the Benoni and Pomona Interchanges, including the widening of the roadway to four 3.7m wide travelled lanes and a 2.5m wide surfaced shoulder. It also included minor improvements to the Pomona interchange to improve traffic flow and the construction of an asphalt overlay. Power employed a number of sub contractors for the contract, including a demolition team to remove a sub-standard overpass structure.

Building lays the foundation for multimillion rand projects

"2009 was characterised by uncertainty and change - both from a work procurement and continuity perspective" says Bert Duncker.

2009 saw the establishment of a Building Division in Gauteng. The team joined with Acucon Building, Gauteng, the main contractor for six upmarket show houses, including the Serengeti Clubhouse. Both projects were underway when Power Building became involved in February 2009. "The very tight time constraint led to a number of our Cape Town staff being temporarily relocated to ensure that deadlines on both projects were met," explains Bert. The six show houses were completed in March 2009. The development's new clubhouse opened its doors in June 2009 when the golf course was officially opened by legendary golfer, Jack Nicklaus.

Projects completed in the Western Cape:

- An R8 million building for Learn to Earn in Hermanus;
- The Living Hope Care Centre in Kommetjie, a R6 million chapel and clinic and;
- The upmarket Almenkerk boutique wine cellar in Grabouw.

The housing division completed an R81 million contract for 1197 units of state subsidised 'Breaking New Ground' (BNG) houses in the Delft 7-9 Precinct 1, over a period of 14 months.

This comprised of freestanding and double storey units. A R3.3 million contract for the building of 50 BNG units at the Joe Slovo Show Village is underway, including the implementation of energy efficient initiatives, such as roof overhangs and solar geysers, to the units.

on the R53 million, Drommedaris Social Housing project in Brooklyn, comprising of four, three and two storey residential buildings with a small portion of commercial space on the ground floor.

Joining forces with the civil division in St Helena Bay, work began on a 3ML and a 510ML reservoir, including a number of pump stations. Expected date of completion is July 2010.

December 2009 saw the site handover of the R10 million Mbekweni Indoor Soccer Arena, closely related to the 2010 FIFA World Cup.

Power Construction spearheads major projects

It has been a busy few months for the Cape Town team who has taken on a number of new contracts.

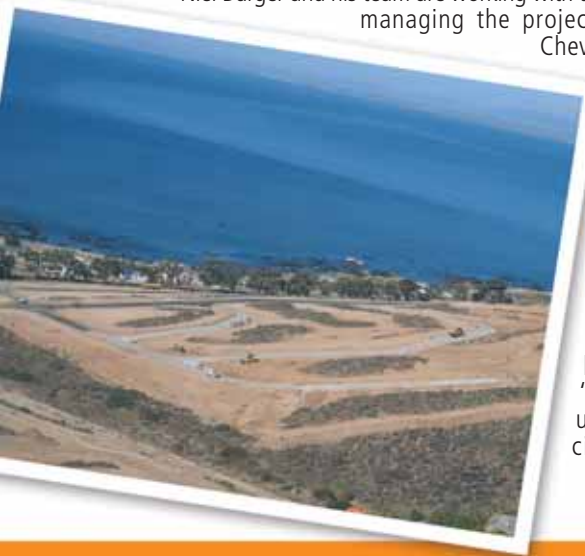

In February 2009, the St Helena Views contract in St Helena Bay commenced. Petrie Smit explains that this Civil Township Project for circa 1400 plots will be built over a period of 18 months by a private developer, West Coast Miracles. Power is responsible for the construction of two onsite reservoirs; both valued at approximately R98 million. "We are on programme despite various challenges."

In October 2009, a housing contract estimated at R87 million, for the Provincial Government began for 850 houses on erven 105 and 107 in Eerste River. "Power's involvement is the implementation of the civil services, within a four month period," says Petrie. He explains that the company has entered into an agreement with a BEE partner, New Heights Civils, who will do the civil services of one segment of the project. Martin Naude's team faced challenges with saturated conditions on site after a wet winter.

In October 2009, Power was appointed to manage a R46-m upgrade at the Petrol giant, Chevron Refinery. The company began constructing a new access road with a staging area into the Refinery, and the upgrade of existing roads that will also house a new weighbridge and buildings.

Niel Burger and his team are working with the ILITHA Group, managing the project on behalf of Chevron. Petrie said

that work is on track for completion by May 2011. There have been a few challenges brought about by internal systems and procedures that have made this 'a normal contract under abnormal circumstances'.

The Koeberg Interchange in Cape Town

A joint-venture between Power Construction and Group Five, this R600 million project at the busy Koeberg Interchange where the N1 and N5 intersect, is well underway.

Johan van Zyl explains this involves the construction of two bridges, the widening and upgrading of roads, and building additional lanes between the busy highways. The project will ease the heavy flow of traffic in both directions. While the widening and upgrading has already been completed, the construction of a bridge will be completed by May 2010.

There have been several challenges during the construction such as the discovery of underground cables that have delayed construction. On a whole, the project has developed smoothly with the help of its 60 team members.

Work continues on busy road

A joint venture between Power Construction and Shar Civils. The TR2 site at Broadlands and Sir Lowry's Pass Intersection involved the upgrading

of the existing TR2, with the construction of two new eastbound lanes. The JV will also do construction work on the existing westbound road.

Robbie Dreyer who has been involved on the project, explains the focus of the project is to improve the existing infrastructure and alleviate bottlenecks. This road presently provides an alternative to the N2 that is still in the process of being upgraded.

Road rehabilitation on the West Coast

The team in Cape Town is working tirelessly towards the completion of its contracted work for the R27 highway reports Anton Strydom.

The project entails 14.8 km of double seal, with the use of 80/100 penetration grade bitumen, 2.2 km double seal using a modified binder, and 5.4km Cold In Situ Recycling (CIR) for which emulsion and cement is applied as a stabilising agent.

Better known as the 'West Coast Road', the R27 is an important link between the seaside village of Yzerfontein, and the city of Cape Town. Valued at R33.3 million the contract has a timeline of seven months.

Power Construction steams ahead despite economic downturn (Eastern Cape)

2009 saw to the full integration of the Coastal teams in Knysna and Port Elizabeth. However, this division also had its fair share of slower activity due to the sluggish economy. "2009 was a tough year due to the economic downturn on the upmarket residential sector; one of our primary sources of revenue," says Paul Thiar.

In May 2009, the division completed the Welgelegen development in George. In the same month, a contract with the Nelson Mandela Metropolitan Municipality commenced for the construction of wetlands at the stormwater outfall from the Motherwell Township. "The objective of this contract is to minimise pollution and improve the water flowing into the nearby Swartkops River," explains Paul.

The division worked with associated Civil Services to complete the Bulk-Earthworks Platform in June 2009 for a new Electrical Sub-station at the Schaap River for the George Municipality. Paul explains that this included the movement of 180 000m³ soil, as well as sewerage, stormwater, potable water and concrete roadways over a period of five months. The contract to upgrade the S-Bend in Humewood, Port Elizabeth for the Nelson Mandela Metropolitan Municipality was completed in December 2009.

According to Paul, negotiations are underway to recommence civil works at the Wedgewood Golf and Country Estate in Port Elizabeth. Work was suspended in 2009, but is scheduled to recommence by May 2010.

"Given the current economic climate, we remain positive that we will secure sufficient work to ensure continuous growth for the Coastal Division," says Paul.

Driving work into action at Strandfontein Road

Commencing in March 2009, phase 1 of Strandfontein Road (M17) entails:

- The construction of approximately 3.5km of the new northbound carriageway between 5th Avenue/Schaap Road and Emerald Way, Schaapkraal;
- The reconstruction of the Strandfontein Road/5th Avenue intersection;
- The implementation of a stormwater system, which includes:
 - 1.5km of 1500 x 1200mm stormwater culverts
 - A 650m earth drain with a floor of 10m wide.

"We have suffered substantial delays on the contract," says Grant, but despite the challenges, the extended completion date for this project is earmarked for the end of October 2010.

Stefan Bothma rejoins Power as CEO of Developments

Since his departure from the company in 2004, Stefan Bothma has assisted with the Thesen Islands project and the friendship and relationship continued throughout. Power Developments is pleased to announce that Stefan has agreed to spend 50% of his time to assist in managing the company's affairs.

As many of you would know, Stefan headed up Power Developments from 1989 (the start of our Development company) until his departure in 2004.

Ons sien uit daarna om saam met Stefan te werk. Mag God hom ryklik seën met wysheid en insig.

Power Developments' - Outlook for 2010

Power Developments completed a serious review of its portfolio and has subsequently embarked on a strategy to consolidate this.

2010 is expected to be the beginning of better times for the property development market and Power Developments has positioned itself through tough actions in 2009 to capitalise on the opportunities expected to present themselves as the broader economy recovers.

A hard hat and heels

The Women in Construction Awards were created to celebrate women contractors in self-employment and as established contractors vying for gender empowerment. Over the past two years, the Expanded Public Works Programme (EPWP) has been met with much enthusiasm from industry professionals and extended governmental departments, since it is as much focused on women as the unemployed in general.

In 2009, Busi Ncala of Ncala Construction (one of Power's Enterprise Development companies) received the second prize for the CIDB National Women in Construction Excellence Award in Category 1 for a woman contractor in Grade 1-3. In 2008, Busi received the Construction Woman of the Year Award in the West Cape region in the "emerging contractor small category".

Special thanks to Chano, Robbie, Ramees and the team for their coaching and mentoring of this business.

Innovation is key!

In 2006 a decision was made to incentivize the staff between Grades 8 and 11 for consistent innovative ideas over a period of 3 years. The winner's prize: A trip to Munich in Germany to visit the Bauma Plant and Mining Show held every fourth year.

Congratulations to Julian Du Preez who received the award in December 2009.

PMR AWARD for Power Construction

During 2009 Power Construction received the PMR Bronze award: for Companies and Institutions doing the most in their sectors over a 12 month period to stimulate Economic Growth and Development of the Southern Cape Region. The company was rated second overall.

Regional Award for Outstanding Civil Engineering Achievement:

Power Construction received the Regional Award for Outstanding Civil Engineering Achievement in the field of Technical Excellence for the project Safety Improvements on the Kaaimans Pass. The award was made by the Southern Cape branch of SAICE in 2009.

"Congratulations to Louwtjie Louw and his team(s) for the sterling work done on a really difficult and demanding project."

Balance quantity and quality for productivity

Power Construction was named the corporate winner for 2009 of the **National Productivity Awards** in South Africa. The national awards recognized the achievements in 2009 in three categories: Emerging, Corporate and the Public sectors.

"Thanks to everyone committed to pushing for better productivity all the time!" says André du Preez. "This award encompasses more than onsite production. It also takes into consideration our innovation, our KPI measurements and our systems that tell us when we are not meeting our targets - and helps us to rectify these."

Power Construction, also received the regional award for the Western Cape in August 2009.

"Improving productive capacity in South Africa is the true source of a competitive advantage that would create long-term economic viability and a better standard of living for all."

"A toast to those who did the most!"

Congratulations to Khanya Blou for winning the Services and Ramees Miller for winning the Construction Forrester Jones Merit Awards in December 2009.

These prestigious awards, in honour of the late Vaughn Forrester-Jones, are presented in December each year to employees who render an outstanding service, not only inside the company, but also to our clients. Vaughn Forrester-Jones, a director of Power Construction, was a role model of service and a mentor to many who have since moved up through the ranks.

Out and About

Arnu Fourie (GPI Office) competed in the FA Golden League 100m race and came FIRST! He is now preparing for the 2012 Olympics and we pray that he will have great success.

Alex Steyn (nee Capostagno) Power's FIRST professional female engineer! Congratulations to Alex who has passed her ECSA board evaluation and is now registered as a Professional Engineer.

A day in the life of a diesel mechanic

Every day, we take for granted that we will start up our cars and within seconds drive off to our various destinations. It's only once our engines start acting up that we pay closer attention and give extra care to its inner workings.

Duncan Webb is the diesel (truck) mechanic for Power. He has been with the company for 12 years and still loves the challenges of the job. "I've always had an interest in mechanics. I had a natural feel for it. The profession presents many daily, on-the-floor challenges. At times we have approximately 2 to 3 trucks per month in for repairs. Sure there is a lot of monotony as in any other profession at times, but it's up to you to challenge yourself and set goals for yourself," says Duncan. Duncan and his team of three; Philemon, Simphiwe and Humphrey have a close working relationship.

Duncan is married to Esther and they have 3 sons. When not in his overalls, he enjoys the outdoors, fishing and motor-biking with his sons.

News from our Chaplain

I recently read a wonderful quote from Gretchen Rubin who said, "While the days are long, the years are short". That little sentence made so much sense to me. We work hard and the days can feel long, but somehow when we look back we wonder where time has gone!

The Psalmist says "Teach me to number my days so that I can gain a heart of wisdom" (Psalm 90:12). As a chaplain within the Power Group of Companies I am constantly trying to find ways to help our staff to make the very most of their work life, their family life, and of course their spiritual life. You will spend between 60-70% of your life at work. That is a huge investment of time and energy! It is important that you spend that time wisely. It matters to God.

So, what does our company chaplain do? Apart from the regular functions such as leading bible study during the week, coordinating prayer meetings, doing counseling, attending various company meetings and visiting our employees in their offices and on site, I also serve on the Power Group's Charitable trust. I work with many of the individuals and groups that we support financially. I also help other companies to set up similar structures to care for their employees and offer support to projects in their area.

A large portion of my time is spent helping Graham with the various ministries that he's involved in. These include the Global Day of Prayer and the Newlands Stadium Prayer Day on 23 May. Then there is the international roll out of the Unashamedly Ethical campaign (www.unashamedlyethical.com).

Some exciting news is that Graham and I have just finished writing a new book which is called 'Transform your work life: Turn your ordinary day into an extraordinary calling!'. Struik Christian Media have published it and it will be launched at the Global Day of Prayer conference on the 21st of May. This book tells some of the stories of how people in our company, and other companies, have used their talents, abilities, and influence to do remarkable things for God – transforming their work life into an opportunity for service and blessing!

Know that my door is always open to you. If ever you need a listening ear, or someone to pray with you for something you're facing, please don't hesitate to make contact! Let's make the most of our days, remember that they matter to God (Col 3:23).

Dion Forster

Power's people do it for charity

The staff at the TR2 site in Sir Lowry's Pass, brought smiles to the faces of the children at Immanuel's Haven. A Christmas Party was arranged for the children on Saturday, 6 December 2009.

Donations to the Helderberg Street People Centre

The centre runs a soup kitchen in Somerset West as well as Sir Lowry's Pass and feeds approximately 700 people. Martha and Richard at the Victoria Street Centre, said that the donation from Power is the biggest one they've received. We filled the boot of the car and still had another

R450 to spend on fresh veggies!! Because we filled the boot so nicely, Ernst van Vondel and Charl Marais shaved their legs (**Veet - For Men, Not for Sissies - For Charity**) and Frikkie Lombard and Riaan Moller had to shave off their moustaches :)

Power does its bit for conservation

The eagle on the nest is the f Klipriviersberg Verreaux's (Black) for whom the nesting platform constructed. She and her mate to the nest 4 days after it was er and both added additional ne material for 8 weeks there. Incubation of the pairs' two commenced, but sadly the bree season failed and the eggs did hatch.

The eagles are still in the vicir They were last seen on 25 Nov high overhead, whilst Siyavaya nest mast. We are positive however that they will be more successful during the 2010 breeding season that usually commences with nest refurbishment by about end March/early April annually.

Siyavaya Joint Venture (of which Power has a 21% share) sponsored this nest after the previous nest was destroyed.

BERGPLAATS GAME LODGE

Bergplaats is situated on 8 500ha of private land on the plains of the Karoo just 80km outside Beaufort West and serves as a private safari destination as well as a tranquil retreat for those needing to escape the stresses of the city life. We offer Self Catering, Bed & Breakfast & Fully Catered accommodation and can accommodate a maximum of 20 guests.

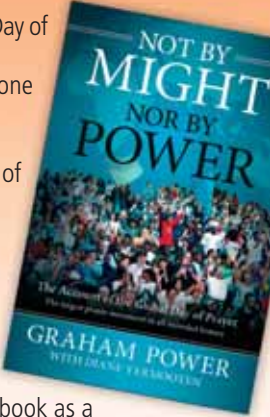

WORLD CUP PRICES FROM R475 PER PERSON
3 LODGES - 8 ROOMS - 20 PEOPLE MAX
